

DLG-certified farm inputs

Barbecue charcoal

**CONTINUOUS
MONITORING**

DLG Certificate 0000

The experts at DLG TestService certify barbecue charcoal according to the product-specific DLG quality standard. In addition to the criteria specified for this effectiveness test, further product properties can be tested and certified. Barbecue charcoals that pass the tests are awarded the DLG quality seal.

All DLG-certified farm inputs are subject to constant monitoring. Consistent product quality is ensured by regular repeat tests or analyses. In addition, samples are taken from the manufacturer or from retailers.

DLG test criteria

Barbecue charcoal

- Water content
- Ash content
- Fixed carbon
- Heavy metal content
- Content of volatile compounds
- Dust formation
- Length of preheating phase
- Flying sparks and smoke during the preheating phase
- Duration of heating phase
- Radiation intensity

DLG TestService is one of the leading international testing and certification organisations in the fields of tractors, agricultural technology and farm inputs. The DLG's own testing and evaluation standards are practice-oriented and are developed by neutral commissions. In addition to tests according to DLG standards, extensive testing and certification services for quality assurance, according to national and international standards and regulations, as well as customer-specific tests for research and development purposes complete the range of services. The DLG test marks are well known on the market. They stand for neutral, independently verified product quality. They build trust and form the basis for purchasing decisions made by practitioners. dlg-testservice.com
