

DLG-certified farm inputs

Animal identification

**CONTINUOUS
MONITORING**

DLG Certificate 0000

The experts at DLG TestService certify animal identification according to all leading national and international standards. In addition to the criteria specified for this effectiveness test, further product properties can be tested and certified. Animal identification that passes the tests receive the DLG quality seal.

All DLG-certified farm inputs are subject to constant monitoring. Consistent product quality is ensured by regular repeat tests or analyses. In addition, samples are taken from the manufacturer or from retailers.

 - Conformance to ISO 11784 and ISO 11785
- Reading range

Conventional identification (ear tags, leg straps)

- Testing according to standards: ICAR, PAS, CCIA and EU guidelines
- Material composition
- Material durability
- Readability (barcode, visual)
- Colour fastness
- Durability of plug-in connection
- Exclusion of reusability

DLG TestService is one of the leading international testing and certification organisations in the fields of tractors, agricultural technology and farm inputs. The DLG's own testing and evaluation standards are practice-oriented and are developed by neutral commissions. In addition to tests according to DLG standards, extensive testing and certification services for quality assurance, according to national and international standards and regulations, as well as customer-specific tests for research and development purposes complete the range of services. The DLG test marks are well known on the market. They stand for neutral, independently verified product quality. They build trust and form the basis for purchasing decisions made by practitioners. dlg-testservice.com
